Experience the future of building—at BAU 2019!
Dates: January 14–19, 2019
Opening hours: Monday–Friday: 09:30–18:00
Saturday: 09:30–16:00

Roadmap to the future: The supporting program at BAU

In the forums at BAU 2019, international experts explore all the different aspects that will impact on the future of building. This is your chance to glimpse tomorrow's world of building—today. Don't miss it!

- The events in the forums
- are included in the price of your ticket
- are interpreted simultaneously German/English

For details on the forums program, go to:
www.bau-muenchen.com/forums

FORUM A4 Architect and Industry in Dialog

- Mon.** In Series: Wood—Steel—Concrete
- Tue.** Interfaces: illuminated and shaded
- Wed.** Urban Remixing: Between Private and Public Space
- Thur.** Living and Care: Living Spaces for Young and Old
- Fri.** Digital: From Design to Implementation
- Sat.** Places for New Learning

In cooperation with:

FORUM A4 DETAIL research—Building the Future

- Mon.** City as a Resource
- Tue.** Material : Intelligence
- Wed.** Winners of the DETAIL Award 2018
- Thur.** Inside : Outside
- Fri.** Serial : Individual?
- Sat.** Design : Production

In cooperation with:

FORUM C2 The Future of Building

- Mon.** Living 2025
- Tue.** Digital!
- Wed.** Facade 2020—smart skin
- Thur.** light, building, automation
- Fri.** The next big thing
- Sat.** Projects around Bavaria

In cooperation with:

Forum C2 powered by
SIEGENIA
brings spaces to life

G

FORUM B0 From Vision to Reality

- Lectures in German only
- Mon.** Efficiency + Life Cycle / Serial R&M
 - Tue.** Interconnecting urban districts: Old ft New / Innovative timber construction made in South Tyrol
 - Wed.** Real Estate Industry Day
 - Thur.** Digital + Future in old Building / Digitalization in Building / Urban districts: smart and resilient
 - Fri.** Materials: sustainable and innovative / Universities Day Students | Design | Future
 - Sat.** Prefabricated timber construction: Building Typologies / Multistory Buildings / BAKA R&M Day

In cooperation with:

Last updated: June 2018

Book your ticket online and enjoy attractive benefits: www.bau-muenchen.com/tickets

Save up to 56 percent: with your digital ticket

- Your benefits when you book a ticket online:
- You can register easily on your smartphone, tablet or computer
 - You can go straight into the exhibition halls—no need to wait in line
 - You save up to 56 percent if you buy online instead of at the venue

Ticket prices

Ticket types	online	at venue
1-day ticket	EUR 27.50	EUR 49.50
2-day ticket	EUR 40	EUR 79
6-day ticket	EUR 54.50	EUR 109
1-day ticket for groups of 10 and over	EUR 27.50	EUR 42.50
Concessions Schoolchildren, students, handicapped, those doing voluntary community service	*	EUR 15

*To book tickets for groups of 10 or more, and also concessionary tickets, please contact us in advance by e-mail: registrierung@messe-muenchen.de. We will then contact you as regards processing your order. Deadline: December 28, 2018. Reduced-price tickets (concessions) are only available upon presentation of proof of status. The price quoted is per person per day, and is inclusive of VAT.

Cutting-edge: the special shows at BAU

Sustainable is the new normal

Global challenges such as climate change and dwindling resources need workable answers, especially from the building industry. At the DGNB special show, ideas and solutions will be presented on forward-looking themes such as the circular economy and strategies for climate-neutral building—so that sustainability will become the new normal.

Spaces for living in the future: digital, sustainable, smart

The demands placed on buildings that are fit for the future are growing steadily. Sector-leading thinking and action are becoming more and more important. Whether digital twin, recycling of building materials, resilient urban districts or smart living—14 Fraunhofer institutes present innovative products and solutions on this from their research work.

Smart Living Man | Building | Technology

Using a real mock-up apartment the GGT will be showing the interaction between man, building and technology. In line with the motto: Comfort for today and provision for the future, this show presents ideas on how to design a more inclusive intelligent space for living that suits all generations.

Building elements TripleS— Smart | Safe | Secure

The special show "Building elements TripleS—Smart | Safe | Secure" demonstrates the benefits of mechatronics in our homes and offices. In a realistic environment, it points out what is important in planning, manufacture, assembly and configuration. And which documents are required therefore.

Tradesmen Meet: Meet, inform, experience

A must for all the skilled trades at BAU 2019—"Tradesmen Meet" in the new Hall C6. In the midst of the trade fair this meeting place for tradesmen and –women from across the industry is a great place to chat and exchange ideas in a relaxed atmosphere. It also features a high-caliber forum with interesting talks from industry experts. And there's a special treat: this year again the German national construction skills team will be setting up their training camp here. At the stand of the Zentralverband des Deutschen Bauergewerbes at the East Entrance.

NEW: DIGITAL VILLAGE

Under the motto of "We connect, we maximize, we inspire" the new Digital Village (Hall C5) at BAU 2019 will be bringing together for the first time digital initiatives in the building industry with current developments in the software sector. Selected start-ups will be presenting their products and business ideas here. An award will be presented for the best digital idea for the future of building.

Three new exhibition sections = Three more good reasons to visit BAU

The two new halls C5 and C6 bring the total exhibition space at BAU to 200,000 m²! That means more space to exhibit exciting and innovative building tools (C6), more space for BAU IT and digital solutions (C5) and space to establish the combination of daylight and artificial lighting solutions and smart building (Hall C2).

Pacesetters: The Key Topics at BAU 2019

Progress in digitalization has really been picking up pace in the building industry in recent years. And that is bringing tremendous changes to the job of planning. In future digital planning tools will become standard, not only in large-scale projects but also in smaller projects and in renovation and modernization work. The building trades must also get ready for this development, because human expertise will always be in demand, but in a different form.

Digital design, build and operate RKW, RG Bau	Room 14a, ICM Tuesday, January, 15, 2019
Digital! Bauverlag	FORUM C2 Tuesday, January, 15, 2019
Digital world of work in building— Changes in employment through digitalization RKW, RG Bau	Room 11, ICM Wednesday, January, 16, 2019
Spaces for living in the future: digital, sustainable, smart Fraunhofer Allianz Bau	Booth C2.528 Monday, January, 14, 2019– Saturday, January, 19, 2019

Great changes are taking place in the world of work. For many the focus is no longer on pay but more on having flexible working hours or a better work-life balance. All of this is of course changing the world of building. Flexible building structures are in demand. New, digital mobility concepts will in future lead to new infrastructure in our cities.

Congress "Building for tomorrow" German Federal Ministry of the Interior, Building and Community	Room 14c, ICM Monday, January, 14, 2019
Living 2025 Bauverlag	FORUM C2 Monday, January, 14, 2019
Real Estate Industry Day MuP Verlag	FORUM B0 Wednesday, January, 16, 2019
Serial : Individual? DETAIL	FORUM A4 Friday, January, 18, 2019

The job of an architect and that of an engineer are sometimes hard to separate. Ever more sophisticated systems demand detailed and integrated planning to avoid planning errors. Prefabrication and modular construction play an important role in this. Digital planning tools enable data to be translated direct into individually manufactured components.

In Series: Wood—Steel—Concrete AIT	FORUM A4 Monday, January, 14, 2019
Powerskin Conference 2019 TU Munich, TU Darmstadt, TU Delft	Room 62, CCN Thursday, January, 17, 2019
Facade 4.0—innovative, intelligent, sustainable RKW, RG Bau	Conference room A51/52 Hall A5 Friday, January, 18, 2019
Prefabricated timber construction: Building Typologies / Multistory Buildings Bauzentrum Poing	FORUM B0 Saturday, January, 19, 2019

Buildings themselves are becoming even more digital. In a smart building all the devices are linked up, for optimum control of energy streams, for example. Artificial lighting is a part of this "smart grid." LED technology has brought considerable change in this area in that space needs are reduced, as well as maintenance requirements. That is having an effect on electrical planning and also architectural design. Lighting designers are now an established part of the planning and design team.

Interfaces: illuminated and shaded AIT	FORUM A4 Tuesday, January, 15, 2019
Inside : Outside DETAIL	FORUM A4 Thursday, January, 17, 2019
light, building, automation Bauverlag	FORUM C2 Thursday, January, 17, 2019
Special show Smart living / Man Building Technology GGT Gesellschaft für Gerontotechnik® mbH	Booth A6.139 Monday, January, 14, 2019– Saturday, January, 19, 2019
